

Title: Instruction of MediaFetcher App

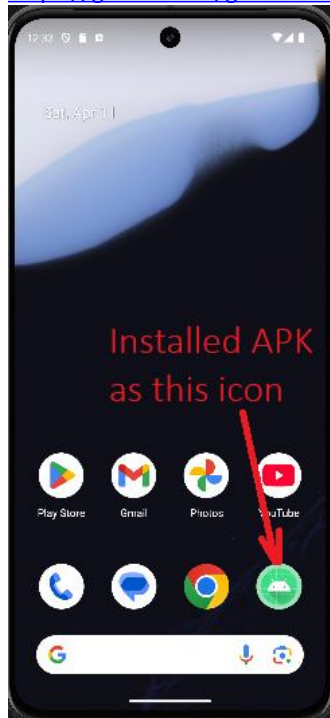

Description: An android app to download video or audio file of youtube video

OS Requirement: Android 7 - Android 16

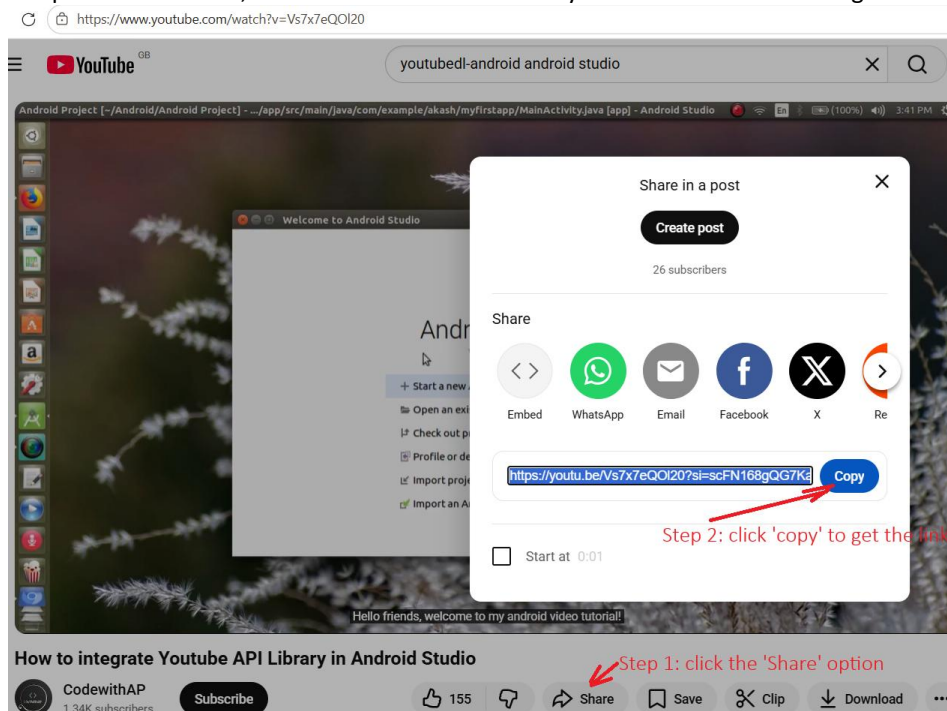

Step by Step Operation Instruction:

1. Download the "app-debug.apk" file to your mobile from the link ->

<https://github.com/goldmanau/MediaFetcher/releases/tag/v1.0>, and then install it.

2. Open web browser, then select a video link from youtube.com as below diagram:

3. Click the installed icon in mobile to start the app. Paste the youtube link to the screen (ctrl + v) and select 'Video' or 'Audio', then press 'Download Now' button. After finished, the 'Download Completed' message will pop-up as below diagram:

4. Open the 'Download' folder in the mobile, select your download video/audio then click it to play.
